

India

Program Description

Travel to India to collaborate with students from KLE Technological University (formerly BVB College of Engineering and Technology) on real-life projects, from start-up companies to established nonprofit and for-profit organizations.

This Global Entrepreneurship & Innovation course is designed to help students understand the importance of innovation and cultivate an entrepreneurial mindset. The course covers different forms of entrepreneurship including small businesses, growth ventures, corporate entrepreneurship and social entrepreneurship. The course also focuses on innovation types, turning innovation into reality and the process of entrepreneurship.

Students stay in a dormitory on the KLE campus in Hubli, becoming truly immersed in Indian culture as they share living space and dine with host students. Visits to New Delhi, the Taj Mahal, Gandhi's home and other important sites add in-depth cultural context to the program.
